CUSTOMER

Field	Description	Type	Default	Other
customerId		int		PK
email		string		
firstName		string		
lastName		string		
telephone		string		
passwordHash		string		
createdAt		datetime		
isActive		boolean		

LOGIN_ATTEMPT

Field	Description	Type	Default	Other
loginAttemptId		int		PK
customerId		int		FK
attemptedEmail		string		
attemptedAt		datetime		
numberAttempts		int		
successFlag		boolean		
failureReason		string		

ROOM_TYPE

Field	Description	Type	Default	Other
roomTypeId		int		PK
roomName		string		
nightlyRate		decimal		
maxGuests		int		

RESERVATION_STATUS

Field	Description	Type	Default	Other
statusId		int		PK
statusName		string		

RESERVATION

Field	Description	Type	Default	Other
reservationId		int		PK
customerId		int		FK
lastName		string		
roomTypeId		int		FK
statusId		int		FK
numGuests		int		
checkInDate		date		
checkOutDate		date		
totalCost		decimal		
createdAt		datetime		

RESERVATION_EVENT

Field	Description	Type	Default	Other
reservationEventId		int		PK
reservationId		int		FK
eventType		string		
eventTimestamp		datetime		
notes		string		

CONTACT_MESSAGE

Field	Description	Type	Default	Other
messageId		int		PK
customerId		int		FK
name		string		
email		string		
subject		string		
messageBody		text		
submittedAt		datetime		
status		string
